History of artificial turf.

Answer ONE question only. Support it with evidence.:

Why did the product get invented?

When was it first installed?

What was it originally made of?

How has the design changed if at all?

You will need direct evidence with lead-in, quotation, and citation.

A quote from an expert in the field about the positive or negative views of the product. ONLY provide a comment that reflects your view.

Personal view. Add any information about your views. Answer the following questions if appropriate. (If you have never played a sport on artificial turf, do not comment on question #1.)

1. Have you played any sport on artificial turf? If "yes," what statements can you make about your experience with regard to the playing surface.

2. Has your family installed artificial turf at your home to save water, reduce chemical use, and eliminate having to cut the lawn?

3. What is your opinion of the look of artificial grass? Do you think it is attractive? Are there situations where it is unattractive?
